

EXPERIMENT 2

2. Create a simple cloud software application for Flight Reservation System using any Cloud Service Provider to demonstrate SaaS.

AIM:

To create a simple **Flight Reservation System** using a cloud service provider (Zoho Creator) and demonstrate the **Software as a Service (SaaS)** model.

PROCEDURE:

- Sign in to Zoho Creator.
- Create a new application named **Flight Reservation System**.
- Create the **Flight Details** form and add flight information.
- Create the **Passenger Registration** form and enter passenger details.
- Create the **Flight Booking** form and connect it with the other two forms using Lookup fields.
- Save the application, enter sample records, and test the booking process.
- Publish the application and access it through a web browser to demonstrate SaaS.
